

### S5 Appendix Exemplary Task of Study 2

*A* and *B* have cut 500 logs each [*A* has cut 200 and *B* has cut 800 logs]. So both persons have cut a total of 1,000 logs. In the empty spaces below, please make the distribution to both people that you think is most just.

*A* needs the wood so that their studio does not become unusable in the winter.

*A* should receive \_\_\_ logs of wood.

*B* needs the wood to avoid freezing in the winter.

*B* should receive \_\_\_ logs of wood.
